

UE SERIES EDGING

INDUSTRIAL, COMMERCIAL

For illustrative purposes only, please refer to installation guides.

UE SERIES EDGING - ES1 TESTED

The Ultra Edge (UE) is a snap lock style edging that has a fast and simple installation procedure. After installing this edge system, you will not need to go back after and strip in the edging, saving time on the job. The IBC building code requires that all low slope roofing systems (built up asphalt, single ply, modified, etc.) use perimeter metal details that have tested according to the ANSI / SPRI ES-1 testing procedure. This applies to copings, gravel stops, and metal edgings. Most states have adopted the provisions of the IBC building code. CMP has developed a line of coping, gravel stops, and edging that have been tested in both aluminum and steel options."

MATERIALS AVAILABLE

- Steel - 24 gauge minimum
- Aluminum - .040" minimum

COLORS AND COATINGS

See all 40+ colors and coatings on the CMP or Alumaklad/Colorklad color charts at www.cmpmetalsystems.com

FINISH AND PRODUCT WARRANTIES

- Aluminum and Steel substrate up to 35 year warranty
